

# TradingView → Claude AI

## Trading Analyst

Every time a TradingView alert fires, Claude analyzes it and gives you:

-  Good trade or not
-  Entry price suggestion
-  Stop loss placement
-  Take profit target
-  Risk warnings

---

### Step 1 — Get your Anthropic API Key

1. Go to <https://console.anthropic.com>
2. Sign up or log in
3. Click **API Keys** → **Create Key**
4. Copy the key (starts with `sk-ant-...`)

---

### Step 2 — Deploy to Railway (free)

1. Go to <https://railway.app> and sign up with GitHub

2. Click **New Project** → **Deploy from GitHub repo**
  3. Upload these files to a GitHub repo first (or use Railway's file upload)
  4. Once deployed, go to **Variables** and add:
    - Key: `ANTHROPIC_API_KEY`
    - Value: your key from Step 1
  5. Railway will give you a public URL like:  
`https://your-app.up.railway.app`
- 

## Step 3 – Set up TradingView Alert

1. Open any chart on TradingView
2. Click the **Alert** button (clock icon)
3. Set your condition (e.g. RSI crosses 30, price crosses MA, etc.)
4. Under **Notifications**, enable **Webhook URL**
5. Paste your Railway URL + `/webhook` :  
`https://your-app.up.railway.app/webhook`
6. In the **Message** box, paste this:

```
{
  "symbol": "{{ticker}}",
  "price": "{{close}}",
  "signal": "YOUR SIGNAL NAME",
  "timeframe": "{{interval}}",
```

```
"time": "{{time}}"
}
```

7. Save the alert

---

## Step 4 — Test it

Visit your Railway URL in a browser:

```
https://your-app.up.railway.app/
```

You should see: "TradingView → Claude webhook  
is live 

When your alert fires, check Railway logs to see  
Claude's full analysis.

---

## Tip: Customize the alert message

You can add anything to the JSON message in  
TradingView:

- "indicator": "RSI" — which indicator triggered
- "signal": "OVERSOLD" — your own label
- "comment": "Price hit support" — any note

Claude will use all of it to give you better analysis.
